

OPD V5.1.4 Release notes

Changes to version 5.1.3

1. OPD labels (operator values, option boxes and check boxes) are written to the S7-block
2. Dynamic OPD message. Values from the S7 block can be combined in the message.
3. New parameter on the S7-block: **ResetOp**. When set, the entered operator values are reset when closing the HMI.
4. User permissions are updated if the faceplate is open and the user is changed.
5. OPD block bug. The outputs QOPOSEL2, QOPOSEL3, QOPCSEL2, QOPCSEL3 were not reset after OPD execution.
6. Order of the inputs OPVS and OPVR inputs updated in the block.
7. Possibility to adjust font size of all OPD texts.
8. Minor design changes to the faceplate.
9. Possibility to reset HMI timer
10. Step number and Batch ID bug fixed
11. Check box bug related to PCS7 9 SP2 fixed

Otherwise same functionality as version 5.1.3.
